

TINKEY

2018

Digital Wallet Winner

Blockchain Development Obstacles

High barriers to entry

Its complicated operations are hard for new users to practice with

Diversified understanding

Different angle, position, concepts cause different understanding to Dapp, blockchain

No recognized standard

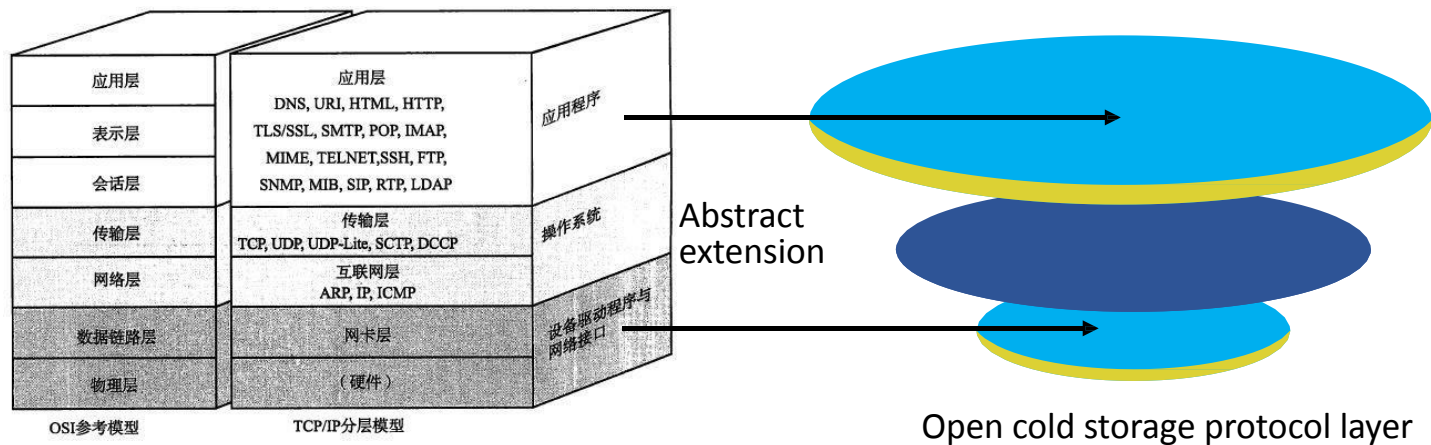

Decentralized idea leads to diversified practices, providing no reference to traditional industries transformation

Unstable base

From hardware to software, architecture and system face endless risks

Proposals

Proposals

1. Centralized organization :
Bank, Insurance, Binance

2. Decentralized organization:
volunteers, Red Cross

3. Personal:
Guita club, calligraphy club

Mining Details

Product Realization

Web: [HTTP://TINKEY.IO](http://tinkey.io)

Product Features

Hardware Wallet

- Support most digital assets available in market including future digital currency issued by Country

Safe storage chip

- Only has erase function, without hardware read interface, unable to crack
- All data saved in circuit "Trusted storage area"
- Private key from truly random nonce in a physical chip
- Secure chip just has signature interface

Authentication

- Develop protocol
- Develop SDK
- Open source code

Hardware Function

- To store authentication certificate
- To save private key

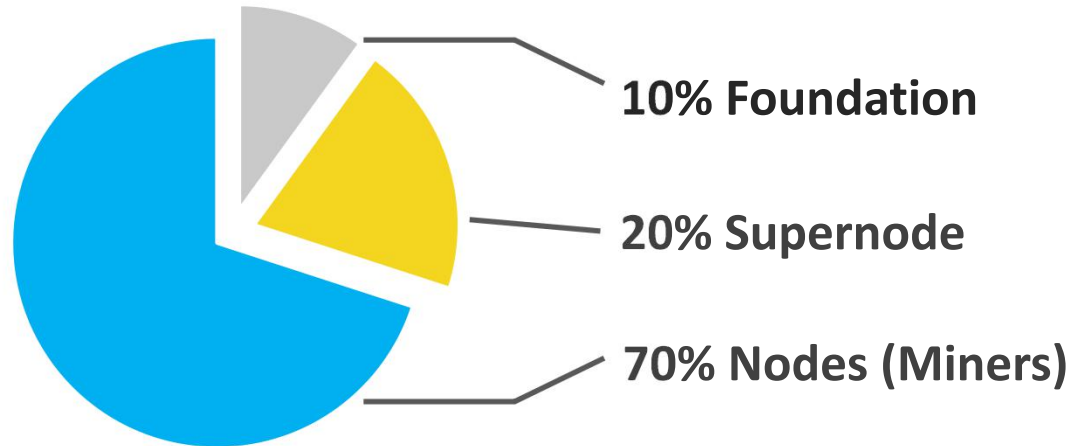

Token Design and allocation

@TKY total is 10 billion

@100% produced by mining

@annually release 20% of TKY remaining

Foundation Plan

@Foundation divides all income to three parts
(include TKY,ETH)

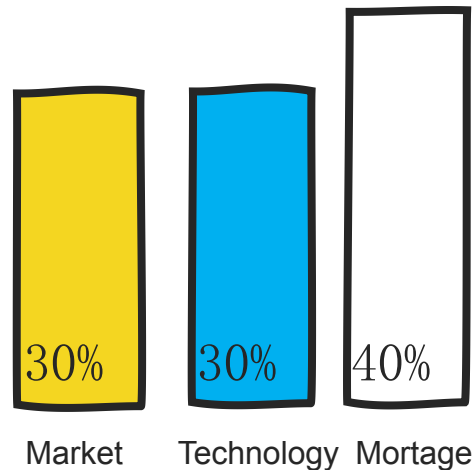

Marketing 30%, use for market promotion, advertisement, rewards to Super Nodes

Technology 30%, use for technique R&D, product production

Mortgage to contract 40%, to ensure price discovery

Token Price

@40% of Fundation revenue will be mortgaged to Bancor protocol

@ More future ecosystem tokens

User Benefits

@Each 0.3ETH donation to TINKEY fundation can be rewarded one updated Tinkey hardware.

@User can get TKY reward according to online duration when use Tinkey

@Each successful recommendation to a new user to donate to fundation will be rewarded 0.1ETH

Super Node Benefits

@Donate 200ETH to TINKEY foundation will become a super node

@Successful recommendation to 1000 uses can be a super node

@Daily acquire 20% TKY produced by miner

@Any of the below contribution can get foundation marketing reward (up to 30% of foundation revenue)

- referred new user amount
- referred project cooperation
- Project ecosystem extension

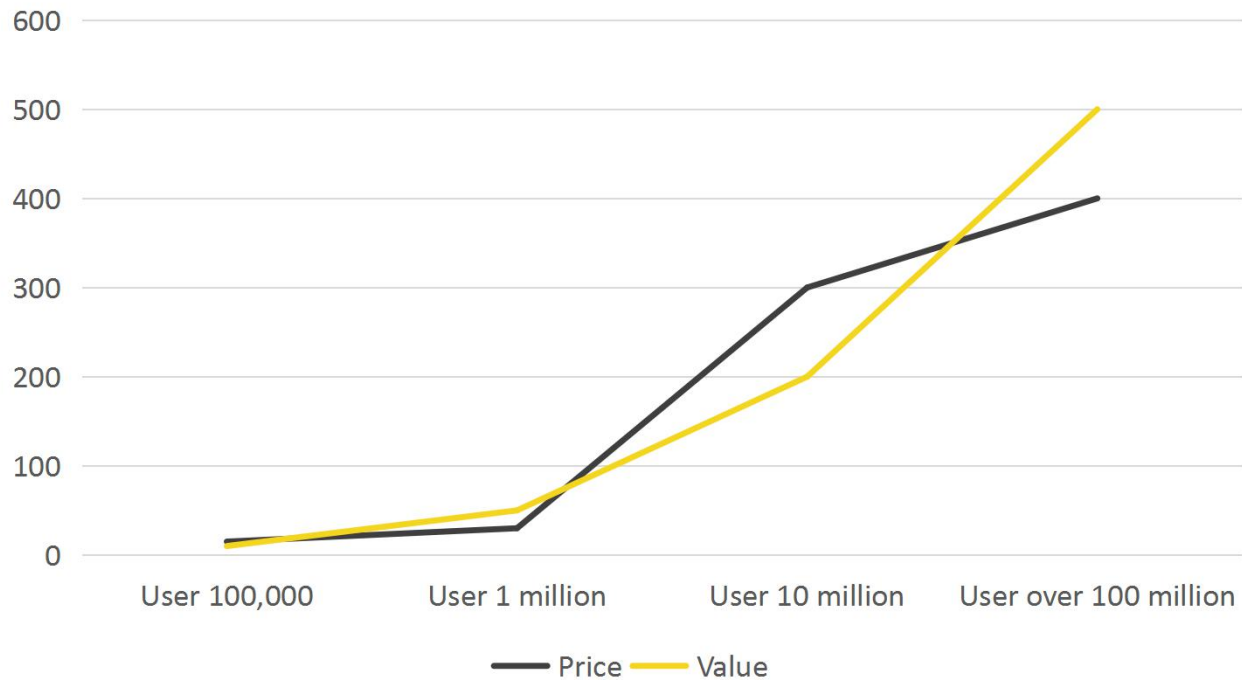

@Successful recommendation to a new super node can get 50ETH reward from foundation.

@Every 0.2ETH donation to foundation can get a TINKEY, super node has priority. If up to each round limit , foundation will stop the donation.

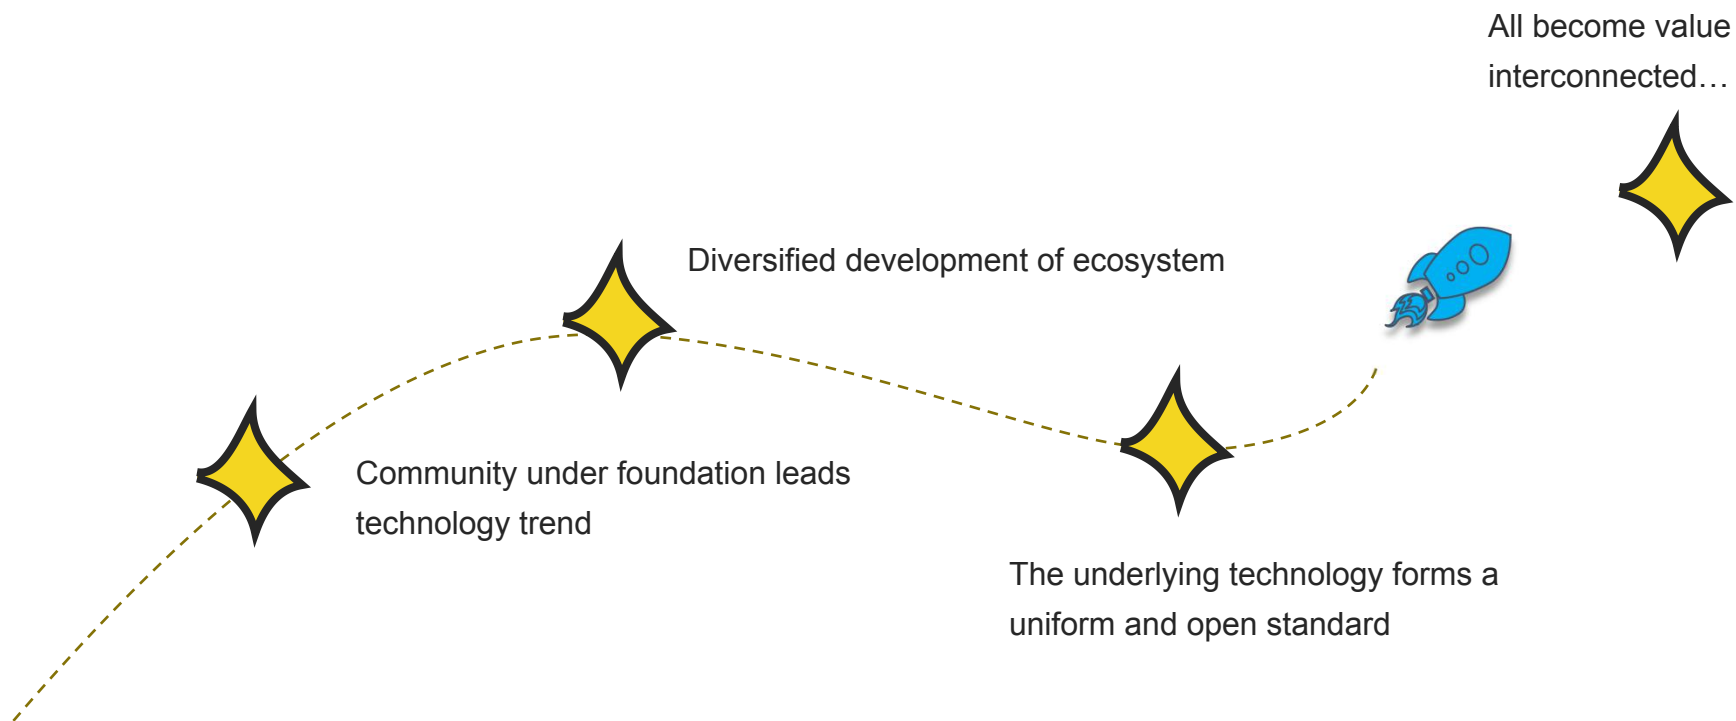

Value Expectation

Look forward your participation
